

## D3 MailWorks Managed E-mail Security

D3 MailWorks Managed E-Mail Security is a comprehensive domain-level E-mail SPAM filtering Service for organizations ranging in size from small businesses to the enterprise level. Our hosted Spam Filters will help your organization become Spam and Virus-free.

### How does D3 MailWorks Enhanced E-Mail Security Service Work?

D3 MailWorks is connected to one of the World's most elite security centres which monitors and blocks the latest Internet threats 24 hours / 7 days a week. Data is collected from around the world, and propagates an up-to-the-minute profile of all the latest SPAM and VIRUS threats. Our servers continually update with the latest filtering information to block SPAM and Viruses before they ever reach your inbox. This solution provides state-of-the-art protection, ensuring that your E-Mail is filtered with the best and most up-to-date technology possible.

D3 MailWorks Managed E-Mail Security filters Spam and E-Mail Viruses BEFORE it enters your network!

Incoming e-mail is routed through D3 MailWorks Secure Data Centre and is 'cleaned' before it reaches your inbox. The delay in your e-mail reaching you can only be calculated in nano-seconds but the cleaning effects are apparent from the moment the service begins, saving you time, money and aggravation.

#### Benefits:

- Spam increases your bandwidth consumption. Filtering SPAM before it reaches your network allows more bandwidth for your users, so they can be more productive while lowering your Internet connection costs.
- Filtering SPAM and Viruses before they reach your network, decreases load on your E-Mail Server, allowing for faster response and reducing the need to upgrade hardware performance.
- Using D3 MailWorks Managed E-Mail Security reduces the chance of a Virus entering your network and compromising an E-Mail server.
- You have one less device or software package to update. Our servers are updated "hourly" with information on the latest security threats.
- There is no hardware or software to install on your servers or workstations (opt. Outlook™ plug-in)
- Keep your existing email address
- No changes to your mail server software required - simply change the MX records of your domains to point to our secure data centres
- Monthly reports
- Blocks 99.5% of spam messages
- Does not block legitimate emails
- No download or software installation required
- Seamless integration for Mail Server option
- No lost email due to power outages or server downtime

### Did you know?

The average employee without SPAM protection spends 30 minutes per day sorting through and deleting SPAM.

That's 10 hours per month that could be going to billable services – PER EMPLOYEE!
